PROFILE

Product designer with UX/UI experience in e-commerce and a background in industrial product design. I research how people use products, turn findings into clear flows and interfaces, and build working prototypes when they help test an idea. Recent work includes Shopify and WooCommerce journeys, Figma component libraries, and a caregiver app tested with 14 participants.

Availability: Available now, with some constraints until 15 Dec 2026.

EXPERIENCE

UX/UI Designer | Admirise Digital Performance Agency | Remote, Germany | Jul 2025 - Jan 2026

- Designed Shopify and WooCommerce journeys across navigation, product pages, cart and checkout.
- Built Figma component libraries and design tokens for handoff to developers.
- Used competitor reviews, heuristic analysis and task flows to shape design decisions; applied WCAG 2.1 accessibility patterns.
- Worked with marketing, development and account teams across German, Turkish and English-speaking colleagues.

Product and Visual Designer | Elysee Playgrounds | Istanbul, Turkey | Sep 2023 - May 2025

- Translated product requirements into 3D models and specifications using Rhino and KeyShot.
- Reviewed usability, ergonomics and assembly flows, then revised prototypes using field feedback.
- Documented interactions and design decisions for engineering and production teams.

UX/UI Design Intern | DFDS | Istanbul, Turkey | Jul 2023 - Aug 2023

- Supported user research, moderated usability tests and UX audits.
- Designed Figma prototypes and organized component files for product and operations teams.

Industrial Product Designer | Turasis Telecom Systems | Istanbul, Turkey | Jun 2020 - Sep 2022

- Designed telecom hardware enclosures and physical interfaces using CAD.
- Prepared technical drawings and bill-of-materials-ready documentation for engineering and manufacturing.
- Worked with engineers and suppliers to resolve part interaction issues before production.

SELECTED PROJECT

Pocket Pediatrics | Caregiver app prototype | IED Barcelona x Fujitsu brief

- Worked on a four-person team to redesign the post-appointment caregiver experience; research pointed to cognitive load as a key source of stress.
- Tested five user journeys with 14 participants using a working Flutter prototype and Supabase backend, alongside two expert reviews.
- Moved sharing to the appointment summary after 7 of 14 participants looked for it there; added confirmation after sending. Sharing received a 4.8/5 rating in testing.

Challenge Based Innovation | Esade, UPC and IED Barcelona | Sep 2026 - Present

- Participating as the designer in a multidisciplinary team exploring a challenge through a quantum computing technology lens.

EDUCATION

MA, Strategic Design Management | IED Barcelona | Expected Dec 2026
BA, Industrial and Product Design | Dogus University | Feb 2023
Erasmus Exchange, Design | Akademia Sztuk Pieknych w Wroclawiu | 2022

SKILLS

Design and research: Figma, component libraries, design tokens, interaction design, user interviews, usability testing, heuristic evaluation, journey mapping, accessibility patterns (WCAG 2.1).

Prototyping and delivery: Flutter, React, TypeScript, HTML, CSS, Supabase, Git, Shopify, WooCommerce. AI-assisted prototyping with Claude Code and Lovable.

Languages: Turkish (native), English (C1), Spanish (A1), Polish and German (basic).
