

Cagdas Ergenc

Product & UX Designer · AI Prototyping · Design Systems & Research

Barcelona, Spain · +34 610 384 707 · cagdasergenc@gmail.com · linkedin.com/in/cagdas-ergenc · cagdasergenc.com

PROFILE

Product and UX designer with five years of professional experience, built in Turkey, Poland, Germany, and Spain. Most of that time was industrial design; digital UI/UX is a more recent, deliberate specialization I've been building seriously since 2023. I work from research through to something people can actually click: user interviews and usability testing, Figma component systems, and functional builds in Flutter and React when static screens aren't enough. AI is part of my daily process, not a bolt-on: I run problems through Claude Code before opening a design tool, and I prototype with Lovable and other AI coding assistants to get to a working build faster. Comfortable reading frontend and backend code and explaining technical work to people who didn't build it. Currently completing an MA in Strategic Design Management at IED Barcelona, graduating December 2026. Based in Barcelona, available now, open to relocating or working remote across the EU.

EXPERIENCE

UX/UI Designer

Admirise Digital Performance Agency · Frankfurt, Germany (Remote) · Jul 2025 - Jan 2026

- Designed end-to-end Shopify and WooCommerce flows covering information architecture, navigation, product detail pages, cart, and checkout.
- Built token-based Figma component libraries the dev team could use without a call every time.
- Ran competitor and heuristic analyses; produced user journeys, personas, and task flows; applied WCAG 2.1 patterns across touchpoints.
- Worked daily inside a fully remote team across German, Turkish, and English-speaking colleagues in marketing, development, and account management.

Product & Visual Designer

Elysee Playgrounds · Istanbul, Turkey · Sep 2023 - May 2025

- Turned product requirements into high-fidelity visuals and detailed 3D models in Rhino and KeyShot.
- Analyzed how parts and interfaces interact to improve assembly flows; evaluated usability and ergonomics, then iterated prototypes on field feedback.
- Created interaction diagrams and design documentation that kept engineering and production working from the same reference.
- Prepared specification sheets and worked through feasibility directly with engineers.

UX/UI Designer, Intern

DFDS · Istanbul, Turkey · Jul 2023 - Aug 2023

- Conducted user research and moderated usability tests; contributed findings to UX audits.
- Designed low to high-fidelity prototypes and standardized Figma file structure and component libraries.
- Documented requirements and acceptance criteria with product and operations teams; supported Agile ceremonies.

Industrial Product Designer

Turasis Telecom Systems · Istanbul, Turkey · Jun 2020 - Sep 2022

- Designed telecom hardware enclosures and physical product interfaces using tolerance-aware CAD.
- Produced structured, bill-of-materials-ready documentation used directly by engineering and manufacturing.
- Coordinated with engineers and external suppliers to resolve part interaction issues before they reached production.

SELECTED PROJECTS

Pocket Pediatrics · AI care assistant for caregivers (IED Barcelona x Fujitsu brief)

- Four-person design team redesigning the post-appointment caregiver experience inside Fujitsu's health platform; research identified cognitive load, not access to care, as the core stressor.
- 14 participants across 5 core user journeys: 7 in-person think-aloud interviews, 7 remote run-throughs, and 2 expert reviews, tested on a working Flutter prototype with a Supabase backend rather than a clickable mockup, rebuilt each iteration.
- Testing changed the design: 7 of 14 looked for sharing on the appointment summary rather than its own tab, and sending gave no confirmation, so the action moved inline and a confirmation was added. Sharing finished as the top-rated feature at 4.8/5.

Personal Portfolio · cagdasergenc.com

- Designed, built, and maintain my own portfolio site end to end in React and Vite.

CBI (Challenge Based Innovation) · Designer, cross-disciplinary team · Sep-Dec 2026 (Upcoming)

- Fusion Point program run jointly by Esade, UPC, and IED Barcelona and grounded at CERN, tackling a challenge through a quantum-computing technology lens in a multidisciplinary team of 5-6 spanning business, design, and engineering.
- Joining as a regular participant, the only designer on the team by the program's one-student-per-discipline structure, including an immersive week at CERN's IdeaSquare in Geneva and a final showcase gala.

EXE · AI governance and agent-behavior design

- 21-page brief for the IED MA program applying the EU AI Act, NIST AI RMF, and OWASP LLM Top 10 to define autonomy tiers, hard behavioral limits, and human-oversight design for an autonomous agent.
- Modeled two risk scenarios and three attacker profiles (prompt injection, delegate misuse, account takeover) against a named persona, then designed the confirmation, transparency, and accountability mechanisms to respond to each.

D&B DTF · E-commerce checkout design

- Designed a custom print-on-demand checkout end to end, applying Baymard Institute and Nielsen Norman heuristics. Case study comparing design options, with the reasoning behind each decision.

EDUCATION

MA, Strategic Design Management

Istituto Europeo di Design (IED) · Barcelona, Spain · Expected Dec 2026

- 60 ECTS, EU accredited. Innovation strategy, change management, organizational design, and stakeholder communication.

BA, Industrial and Product Design

Dogus University · Istanbul, Turkey · Feb 2023

- 240 ECTS, EU accredited. Materials, manufacturing processes, technical drawing, and CAD.

Erasmus Exchange, Design

Akademia Sztuk Pięknych w Wrocławiu · Wrocław, Poland · 2022

SKILLS & TOOLS

Design: Figma (auto-layout, components, design tokens, prototyping), design systems, interaction design, wireframing, Adobe Creative Cloud.

Research: User interviews, moderated usability testing, heuristic evaluation, competitor analysis, journey mapping, personas, service blueprints.

AI & Prototyping: Claude Code, Cursor, ChatGPT, Lovable, OpenAI API (GPT-4o-mini, Whisper), Hugging Face, MCP connectors, n8n (personal automation projects, not yet professional work), no-code prototyping platforms.

Code literacy: React, Flutter, TypeScript, Vite, HTML, CSS, Supabase, REST APIs, Git. Reads and navigates Python/FastAPI and C# backends.

E-commerce: Shopify, WooCommerce, checkout and product detail page optimization, WCAG 2.1 accessibility patterns.

3D & Industrial: Rhino 3D, KeyShot, V-Ray, 3DS Max, technical drawing, tolerance-aware CAD, specification sheets.

Ways of working: Agile ceremonies, Jira, Notion, Slack, Miro, Microsoft 365, remote multi-timezone collaboration.

Languages: Turkish (native), English (C1), Spanish (A1, actively studying, not yet professional level), Polish and German (basic).
